                    ! Image Synopsis !
                    +-----------------+

Virtual memory allocated:                00000000 00020FFF 00021000 (135168. bytes, 264. pages)
Stack size:                                     0. pages
Image header virtual block limits:              1.       1. (    1. block)
Image binary virtual block limits:              2.     265. (  264. blocks)
Image name and identification:           SYSMSG 2-005
Number of files:                                1.
Number of modules:                              1.
Number of program sections:                     5.
Number of global symbols:                    2440.
Number of image sections:                       1.
Image type:                                PIC, SHAREABLE, Global Section Match=EQUAL, Ident, Major=18, Minor=15132525
Map format:                              FULL in file _$255$DUA28:[MSGFIL.LIS]SYSMSG.MAP;1
Estimated map length:                    321. blocks
                  +----------------------+
                  ! Link Run Statistics !
                  +----------------------+

Performance Indicators                   Page Faults   CPU Time        Elapsed Time
----------------------                   -----------   --------        ------------
    Command processing:                           36   00:00:00.15     00:00:00.24
    Pass 1:                                      649   00:00:03.81     00:00:05.34
    Allocation/Relocation:                        37   00:00:00.15     00:00:00.32
    Pass 2:                                      294   00:00:00.93     00:00:03.25
    Map data after object module synopsis:        56   00:00:11.98     00:00:13.52
    Symbol table output:                           5   00:00:00.08     00:00:00.24
Total run values:                             1077   00:00:17.10     00:00:22.91

Using a working set limited tc 1650 pages and 941 pages of data storage (excluding image)

Total number object records read (both passes):   206
    of which 0 were in libraries and 0 were DEBUG data records containing 0 bytes

Number of modules extracted explicitly             = 0
    with 0 extracted to resolve undefined symbols

0 library searches were for symbols not in the library searched

A total of 4 global symbol table records was written

LINK/USERLIB=PROC/SHARE=EXE$:SYSMSG/MAP=MAP$:SYSMSG/FULL OBJ$:SYSMSG
